

1 connection of injectors using T-pipe and rubber hose enable assembling in different configurations

2 connection of injectors using modular distributor and rubber hose enable assembling in different configurations

T-pipe for modular connection of the injectors

modular rotational (360°) distributor

INJECTORS MOUNTING ACCESSORIES

TYP: Mounting accessories

MODEL: TECH-DRAGON / TECH-YETI

MODULAR T-PIPE TO INJECTORS CONNECTION

Modular adapter, T-pipe designed for YETI injectors. Enables the connection of single injectors with a gas hose through 360° rotating supply nozzles with a diameter of 12 mm. The tee can be rotated around the axis of the injector. This solution eliminates the gas hose stress caused by variable temperature and engine vibration during drive. Element is made of high quality composite material, resistant to variable temperature and mechanical damage.

- Modular structure,
- 360° rotating supply nozzle,
- Made of high quality composite,
- Resistant to variable temperatures,
- Resistant to mechanical damage,
- Equipped in high quality sealing materials,

MODULAR ROTATIONAL DISTRIBUTOR

Modular splitter for Dragon Solo and YetiSolo injectors. Used to distribute gas from the reducer to individual injectors. The slate consists of single sections and 12 mm Ø feeders which can be rotated around the axis. This solution eliminates the gas hose stress caused by variable temperature and engine vibration during drive. Element is made of high quality composite material, resistant to variable temperature and mechanical damage.

- Modular design,
- Rotational supply nozzles Ø 12,
- Made of high quality composite
- Resistant to variable temperatures,
- Resistant to mechanical damage,
- High quality sealing o-rings,
- Rotational single section with diameter Ø6,
