

- Made from the highest quality materials
- Resistant to substances contained in LPG
- Resistant to mechanical damage
- Resistant to extreme temperature changes
- Perfect replacement for copper pipes

TECHNICAL SPECIFICATION:

- Testing pressure: > 200 bars
- Available fittings angles: 90°, 180
- Available in two standard sizes: D6, D8

Thermoplastic hose

TYPE: Thermoplastic hose**MODEL:** LPGTECH Thermoplastic hose

Thermoplastic hose made by LPGTECH is a perfect replacement for traditional, copper pipes. The hose structure minimizes the possibility of creating kinks, even at high flexion, allowing a constant and uninterrupted flow of LPG. By using the highest quality materials, LPGTECH thermoplastic hose has gained exceptional flexibility, which makes its assembly extremely fast and hassle-free.
